

# Lifeloc Sentinel

 CMM  
Technology™  
Workplace Drug & Alcohol Testing

## Advanced On-Site Alcohol Testing

**QUALITY**  
ISO 9001

**ENVIRONMENT**  
ISO 14001

**HEALTH & SAFETY**  
ISO 45001

## New Technology

**Entry System Capability:** Can integrate with locking systems on Turnstiles, Entry Booths, Time clocks or any other gate access system.

**Rapid Testing:** Provides a Positive or Negative response for alcohol. No mouthpieces required - no environmental disposal issues. Low cost per test.

**Lightning Fast Repeatability:** Instant response time - up to 1500 tests per day.

**Rugged Housing:** Anodized aluminium construction. Created for high dust, high vibration environments.

**Remote Updates:** Field updates using USB.

**Customisation:** Custom user interface or test sequence.

**Serviceability:** Calibration is a simple modular system allowing for fast, in-field changeover.

The Lifeloc Sentinel uses a full colour LCD screen along with easy to understand icons to clearly communicate with the test subject making for easy interpretation by user.

Lifeloc have been at the forefront of breathalyser manufacture for over 30 years.

Their experience of producing devices for law enforcement has given them unparalleled knowledge of what the user requires, the engineering required to create such a device and the years of research required in order to produce a high quality device.

The Sentinel has been designed for harsh conditions, coming standard with gasket seals, anodised aluminium lockable case which provides protection from dust, vibration, condensation and tampering.

The modular system makes calibration time a breeze - simply open the unit and swap out the internal breathalyser with a pre-calibrated unit saving time and money and in doing so never compromising your site by having no breathalyser onsite because it has been sent in for recalibration.

Simply put, the lifeloc Sentinel is a step forward in onsite alcohol testing.

## Key Product Information:

- One-step process.
- No mouthpieces.
- Full colour LCD screen
- Fast throughput - up to 1500 tests per day.
- Simple to use - easy to understand user interface.
- Accurate - utilising a 25mm fuel cell.
- Modular system allows for fast changeover of modular breathalyser.
- Remote area software updates are a breeze using a simple USB stick.
- Gaskets - Breath port, door and screen gaskets reduce the ability for dust and moisture to gain entry to the unit.
