CMM Technology™ assists companies to mitigate risk through the supply of drug & alcohol testing equipment and we offer specialist Drug, Alcohol & Hydration Testing Services.

In an Australian workplace where temperatures are extreme and working conditions lead to heat stress, we are committed to assisting workers to monitor and manage hydration through the provision of reliable and accurate hydration testing technology.

As a NATA accredited laboratory in the fields of Chemical Testing and Medical Testing and an accredited collecting agency with over 15 years in the industry, our valued clients have come to rely on us for reliable well-informed advice in addition to stringently tested, high quality, test devices and laboratory services.
The Medix™ Pro-Split Cup with in-built integrity testing offers an advanced split unit design and an adulterant testing strip for greater analytical capability. This enables a segment of the test sample to: a) be directed to an antechamber with a built-in thermometer to determine whether a sample is recently collected or “fresh”; b) to test for additional contaminants.

- AS4308 Verified
- Tests for Adulterants
- Can detect synthetic/fake urine
- In-built thermometer
- Fast - results in as little as 30 seconds

Detects the following 6 drugs:
- Amphetamine
- Benzodiazepines
- Cocaine
- Methamphetamine
- Marijuana (THC)
- Opiates

Detects the following adulterants:
- Creatinine
- Nitrite
- Gluteraldehyde
- pH
- Specific gravity
- Oxidants
- Pyridinium chlorochromate

We can supply these cups in a ‘Urine Support Kit’ - enquire to find out more.

**Key Product Information:**

- Splits the instant test sample from the main laboratory sample
- Reliable - millions of these tests sold with few issues
- Cost effective
- Online training for customers

**Ongoing Proficiency Testing**

CMM Technology™ participates in a registered proficiency program provided by The Royal College of Pathologists of Australia that is designed to monitor the ongoing proficiency of the Medix™ Pro-Split cup. The monthly RCPA QAP (Quality Assurance Program) provides a quality independent platform for CMM Technology to check the performance of the Medix™ Pro-split cup throughout the year. In addition to this CMM Technology™ also conduct regular in house testing of the Medix™ Integrated Pro-split Cup using certified quality controls.
URINE DRUG TESTING

Innoscreen DOA Quick Cup Features:

- AS4308:2008 verified
- Covers all drugs under AS4308
- Tests for adulterants
- Positive results within 5 minutes, negative results in under 90 seconds.

**FEATURES**
- AS 4308 Verified
- Tests for adulterants

INNOSCREEN
6 Panel - Fast & Easy

SURESTEP
8 + 3 Panel

The SureStep 8+3 with in-built integrity testing offers an advanced split unit design and an adulterant testing strip for greater analytical capability.

This device tests for 8 drugs of abuse and 3 adulterants giving a wider detection range than Australian standards dictate.

**FEATURES**
- Independently Verified by AS4308 accredited Laboratory
- Can be stored at room temperature (2-30°C)
- Detects active drugs in the system
- Results in as little as 5 minutes after collection

UREINE SUPPORT KIT
Everything you need

These support kits are extremely useful for clients either in the initial stages of implementing their workplace drug and alcohol testing program and companies that have added other sites to their testing program.

Our comprehensive kits contain everything needed to conduct an onsite urine drug test

**FEATURES**
- Everything you need contained in one easy to access 'toolbox'
- Never miss an opportunity to test because you do not have the right equipment or paperwork
- All paperwork conforms to AS4308
- How-to guides included

DESIGNER DRUG TESTING

Collect & Test

CMM Technology in conjunction with a NATA accredited laboratory, have established proven protocols to screen and validate for over 200+ compounds.

Laboratory immunoassay’s provide a more comprehensive testing opportunity and can cover many more compounds than traditional instant tests.

The collection process for this test is easiest done whilst conducting your usual drug testing.

LAboratory Urine Immunoassay
This type of testing allows you to broadly screen your workforce for the presence of many types of synthetic compounds.

Key Product Information:

- This testing covers synthetic cannabis as well as other designer drugs such as bath salts.
- Detects hundreds of synthetic compounds.
- Detects all synthetic amphetamine compounds.
- Your testing program can be tailored to look for specific compounds.

ADDITIONAL INFO

There are thought to be over 450 synthetic drug compounds worldwide and up to 200 having been seen in Australia to date.

These synthetic drugs are often overlooked in traditional workplace drug screening programs because of the complexities involved in the detection of this group of so called designer drugs.
The Alere™ DDS®2 Fully Automated Mobile Saliva Drug Test System meets the high performance demands of law enforcement agencies, drug treatment centres and workplace testing environments.

This system is a fully automated drug testing solution which combines speed, ease of use and reliability.

Perhaps the most important feature of this device is that it removes subjectivity from interpretation of the result.

- Accurate results every time - no collector has to guess.

The total analysis time is approximately 8 minutes from collection to result.

**ALERE DDS2**

**Oral Fluid Drug Detection System**

The Alere™ DDS®2 Fully Automated Mobile Saliva Drug Test System meets the high performance demands of law enforcement agencies, drug treatment centres and workplace testing environments.

This system is a fully automated drug testing solution which combines speed, ease of use and reliability.

Perhaps the most important feature of this device is that it removes subjectivity from interpretation of the result.

- Accurate results every time - no collector has to guess.

The total analysis time is approximately 8 minutes from collection to result.

**Key Product Information:**

- Provides an on-site alternative to laboratory screening
- Removes all subjectivity from results interpretation
- Rapid oral fluid collection
- Portable, compact and lightweight
- CE marked
- Full colour screen, readable day and night
- Stores 10,000 results
- Software to manage test data (optional)
- Report generation - print results if required
- Ability to test from battery, mains power or in car charger (optional extra)

**Buy Back Offer**

Already have a DDS1 and want to upgrade? Talk to us about our great trade-in offer to help you get into the best on-site saliva drug testing technology in the world and improve your testing program.

**ADDITIONAL INFO**

Detects the following 6 drugs:

<table>
<thead>
<tr>
<th>DRUG CLASS</th>
<th>CUT-OFF</th>
</tr>

**Products by Alere**

**Easy Use Swab & Cartridge**

**Complete Kit**

**Additional Info**

Detects the following 6 drugs:

- Amphetamine 50
- Cocaine 30
- Methamphetamine 50
- Marijuana (THC) 40
- Opiates 25
DrugCheck 3000 Oral Fluid Drug Screen Device is developed to detect active drugs-of-abuse present in saliva. The compact and quick oral fluid based drug test yields reliable results affordably. It easily detects 5 common drugs of abuse and can come as a 6 panel device.

FEATURES
- Built in saliva sufficiency indicator
- Tests for 5 or 6 drugs of abuse (BZO optional)
- Detects active drugs in the system
- Results in as little as 3-5 minutes after collection

The ToxWipe Oral Fluid Drug Screen Device is a premium rapid test for drugs of abuse in oral fluid (saliva) and surfaces. Detects Opiates, Amphetamines, Methamphetamine/MDMA, THC, Cocaine & Benzodiazepines in human oral fluid. Using this device is simplicity itself.

FEATURES
- Independently Verified by A4760:2006 accredited Laboratory
- Can be stored at room temperature (2-30°C)
- Detects active drugs in the system
- Results in as little as 5 minutes after collection

SALIVA SUPPORT KIT
Complete Testing Kit
This kit caters for businesses of all sizes who are just starting up their drug and alcohol testing program and have never completed a test before.

It is also recommended for those who need to add another site to their program and require another complete kit with everything they need.

SYNTHETIC DRUG TESTING:

Over 200 Compounds including Bath Salts etc.

Synthetic Cannabis & more recently 'Bath Salts' has taken Australia by storm and is the most recent challenge to our workplace.

CMM Technology can test for almost any synthetic drug including: cannabinoids, other designer drugs such as "bath salts" and the full range of synthetic amphetamine compounds.

Talk to us today about our screening services to ensure that you can know if you have a 'synth' problem in your workplace - don't guess, find out for sure.
SURFACE DRUG TESTING

XCAT

Surface Drug, Gunshot & Explosives Detection System

RedXDefence Handheld XCat Narcotics, Explosives and Gunshot Residue Detection System

The RedXDefence XCAT handheld detection system (selected as one of the year’s 12 Really Cool New Police Products by the USA’s POLICE® magazine), features automated, one-step detection of narcotics, homemade and high explosives, and gunshot residue.

The XCAT can be used for sampling suspicious drugs and other substances on hands, vehicles, packages and surfaces.

Key Product Information:

- Red light/Green light – no color charts
- No user exposure to chemicals or broken glass ampoules
- Internal Li Ion battery – battery life 7+ hours
- One year warranty
- Upgradable in the field – no charge, with micro-SD
- 100% Satisfaction Guaranteed

NARCOTICS:

- Provides a technological solution which is a significant improvement over chemical colorimetric kits.
- Trace detection of residue from spoons, beakers, baggies, pipes, liquid from syringes, pills, powders, rocks.
- Amphetamines, Cocaine, Heroin
- Tested and Validated by NFSTC in Tampa – National Forensic Science Technology Centre and VA Dept. of Forensic Science
- Operational cost same as chemical test kits
- Sampling card shelf life: 1 year

GUNSHOT RESIDUE DETECTION:

- Field presumptive test for Lead – based on Rhodizonate test
- Sensitivity – 1 to 4 shots.
- Sample collection optimized – adhesive and paper section
- Unlike other GSR field test kits, XCAT does not alter sample
- XCAT GSR card can be sent to crime lab for Full GSR Confirmatory on SEM. This capability never existed before.
- Sampling card shelf life: 1 year, cost less than a SEM kit

TRACE EXPLOSIVES DETECTION:

- Particulate detection from hands, surfaces, mail, bags, luggage, vehicles
- Detects Nitramines, Nitroaromatics, and Nitrates
- Rugged, easy to use, affordable
- Clear unattended bags
- Force protection application
- Target hardening – make terrorists go somewhere else
- Sampling card shelf life: 9 months (NTR) 1 year (NTA)

TATP, HMTD

C4, RDX, PETN, SEMTEX, DET. CORD, DETA SHEET, NITROGLYCERIN, NITROCELLULOSE, AMMONIUM NITRATE, AMFO, UREA NITRATE, BLACK POWDER

TNT, TETRYL, AMMONIUM PICRATE, PICRIC ACID, COMP B

VARIOUS ALKALOIDS, OPIOIDS, AMPHETAMINES, AND CATHINONES (“BATH SALTS”), INCLUDING COCAINE, “CRACK COCAINE”, PCP, HEROIN, FENTANYL, ACETYLFENTANYL, HYDROCODONE, AMPHETAMINE, METHAMPHETAMINE, MDMA, CATHINONE, 2C-I, MEPHEDRONE, PYROVALERONE, METHEDRONE, BUTYLONE, TFMP, ALPHA-PVP (“FLAKKA”), FENETHYLLINE.

GUNSHOT RESIDUE

* ADDITIONAL CAPABILITIES MAY BE AVAILABLE.
Our trained technicians will assess and calibrate your breathalysers on state of the art calibrators to ensure their optimal performance. We will confirm this service by issuing an accredited calibration certificate. We also provide a free ‘Calibration Reminder’ service.

Options
- Same day turnaround
- Scheduled reminders
- NATA Certificate

We not only calibrate breathalysers, but we also service them (repairs, cleaning, upgrades, software updates etc.). This ensures your device is kept at optimum levels and complies with the manufacturers specifications/warranty etc. Regular servicing is vital to the smooth operation of your alcohol testing program.

Additional Services
- Download Customer Data
- Rotational Stock Control

We supply a full range of accessories for our breathalysers: Ranging from mouthpieces to data management software, protective cases, calibration equipment, entry to site add-ons etc.

Accessories
- Mouthpieces
- Data Management Software
- Cases
- Calibration Gas
- Documentation

Additional Info
CMM Technology are the only NATA accredited calibration laboratory in the country - authorised to calibrate both hand held & wall mount breathalysers. CMM Technology are ISO accredited to 9001:2015, 14001:2015 & 45001:2018. This means you can rest assured you are dealing with a quality provider.

Breathalyzers Service List:
- Lifeloc
  - FC200T
  - FC20
  - FC10 Plus
  - FC10
  - FC5
  - Lifeguard
  - Sentinel Wall Mount
- Drager
  - 6810, 6820 & 7510
  - 6510 & 5510
  - SB20, 5000 & 3820
- Alcotec
  - 1000
  - 1005
- Alcolizer
  - HH1 & HH2
  - HH3 & HH4
  - LES
  - Wallmount 4
- Lion

  - SD500
  - SD700
- Alcoblow
  - Alcoblow RT
  - ADT
  - BTA-DAS-30-I Wall Mount
  - Alcosense Precision
  - ACS
  - Alert J5

Australian Standards Approved
- All Breathalysers are AS 3547 Approved.
ALCOHOL TESTING

LIFELOC BREATHALYSER RANGE

Unsurpassed Quality

Lifeloc have been at the forefront of breathalyser manufacturing in the USA for over 30 years.

Their experience in engineering and producing devices for law enforcement has given them unparalleled knowledge of what the user requires in either industrial or personal use.

It takes years of research and engineering to create the high quality device that you get when you purchase a Lifeloc breathalyser.

CMM Technology are proud to be the Authorised Sales and Service Agent for Lifeloc in Australia

Key Product Information:

- Lifetime warranty on Fuel Cell.
- Full sized 1" (2.5cm) Platinum Fuel Cell.
- Fast cycle time.
- AS 3547 Approved.
- Australian service agent.
- Extended warranty available.
- Rugged and robust cases for the toughest applications.
- Outstanding accuracy: 2.0cc breath sample size for high sensitivity and small margin of error.

ADDITIONAL INFO

When you purchase a Lifeloc breathalyser, you are buying into a system of quality and reliability. Lifeloc are renowned for the quality of manufacture and immensely accurate devices.

Passive mode included in all models, does not need a mouthpiece when operating in this mode.

LIFELOC EASYCAL G2

Calibration Station

Lifeloc Technologies second generation calibration station the EASYCAL G2 is another step to making compliance easier, faster and more affordable.

The EASYCAL G2 automates every step of the calibration and accuracy check process, works with four different tank sizes, introduces Lifeloc’s ID Enabled tanks and calibrates our professional portable breath testers including the FCS Hornet.

Compatible Devices

- FC20BT
- FC20
- FC10+Plus
- FC10
- FCS

LIFELOC SENTINEL

Wall Mount Breathalyser

The sentinel was designed from the ground up for workplace testing and specifically for entry to site. See some of the many features below:

- Sentinel integrates with virtually all gate entry systems, time clocks, turnstiles etc.
- It is a Passive Testing device, providing a Pos or Neg response for alcohol. No mouthpieces required = low cost per test.
- It’s fast with an instant response time – enabling up to 1500 tests per day.
- It’s rugged - made from anodized aluminium & created for high dust, high vibration environments.
- Serviceability: Calibration is a simple modular system allowing for fast, in-field changeover.

Accessories

- Warning light
- Entry to site integration
The FC20 BT is the top of the range fuel cell breath alcohol tester from Lifeloc that provides accurate and reliable measurement of BAC. The FC20BT now comes with wireless capability allowing for trouble-free connection to other Bluetooth devices &/or data download & printing. Easy, fast and reliable just got better.

**Accessories**
- Mouthpieces
- Alcomark Data Management Software
- Printer in a Kit Package

The FC20 is the same as the above FC20BT but without Bluetooth connectivity. It has all the features that users have come to love and provides accurate and reliable measurement of BAC with the ability to use the data management software.

**Accessories**
- Mouthpieces
- Alcomark Data Management Software
- Printer in a Kit Package

The Lifeloc FC10 Plus is the mid level Lifeloc unit favoured by our customers. It is by far the most popular unit, being able to conduct both passive & active testing it fits all workplace testing scenarios. The price point of this device is also favoured by our customers who want a reliable device that will last through the years.

**Accessories**
- Mouthpieces
- Rubber Grip
- Quality Case

The FC10 is our entry level workplace breathalyser offering - it still has the same high quality fuel cell & components but less features than the other models with a price point to suit but with a limited test recall and no real-time check.

**Accessories**
- Mouthpieces
- Case
- Rubber Grip

The FC5 is our most popular passive testing device. Capable of processing hundreds of people a day and without the associated cost of mouthpieces, this unit pays for itself very quickly.

**Accessories**
- Case
- Rubber Grip

The Lion SD400 is a fully automated unit; this all encompassing breath alcohol measuring instrument is also recommended for use by traffic police, heavy industry, medical departments and in many other industry sectors.

The SD700 is small in size and weight, yet big on performance. Its unique ergonomic design offers ease of use in a compact instrument which fits easily into a pocket or clips to a belt.

Just switch on, attach a fresh mouthpiece and tell the subject to blow. It’s that simple!

With easy to use functions, this passive alcohol detection device enables the collector/supervisor to determine whether a worker has any alcohol in his or her body – literally, within seconds.

Drunk Busters Goggles simulate effects of impairment, including reduced alertness, slowed reaction time, confusion, visual distortion, alteration of depth and distance perception, reduction of peripheral vision, poor judgement and decision making, and lack of muscular coordination.

For some people, impairment might result after as little as one drink. Impairment can also result from combining alcohol with prescription medication. Use of illegal drugs is also impairing, with no BAC level even present.

The Drunk Busters Goggles range represent a BAC level from approximately .04 to a mind numbing .35. Drunk Buster Goggles also tackle fatigue and drugs to simulate drugs such as cannabis, LSD, Ecstasy and ‘Molly’.

Enquire now to find out how these goggle can fit into your fitness for work education program. Have some fun whilst providing an invaluable educational tool.

ALCOHOL TESTING

The compact hand-held measuring instrument Alcotest 6820 ready for use within 4 seconds and is adaptable to international guidelines. With an even more sturdy enclosure and the proven Dräger sensor, Alcotest 6820 is a reliable partner for breath alcohol analyses.

DRAEGER 6820
Breath Alcohol Tester

Accessories
- Mouthpieces
- Printer
- Data Download

The Dräger Sensor with its optimized gas dynamics measures specifically alcohol. Even at high alcohol concentrations the short reaction times of the sensor ensure the measurement result will be displayed quickly. The very latest in electronics technology ensures that the instrument is ready for use in no time at all.

DRAEGER 5820
Breath Alcohol Tester

Accessories
- Mouthpieces
- Case

The Dräger Alcotest® 5000 is a professional breath-alcohol tester which detects the presence of alcohol. The high-speed breathalyser lets you perform numerous tests in no time. Its special funnel reduces the back-flow of expired air to a minimum, preventing the risk of infection to subsequent test subjects.

DRAEGER 5000
Passive Breath Alcohol Tester

Accessories
- Optional reflector film set (yellow or orange)
- Alcotest® 5000 funnel
- Alcotest® 5000 calibration adapter

ALCOLIZER HH4
Breath Alcohol Tester

Accessories
- Mouthpieces
- Microfibre Pouch

The HH4 has the following features:
- Advanced functionality with colour screen
- Industrial grade alcohol tester, robust and reliable
- Multi-function testing with data download
- Bluetooth connectivity standard
- Connect via AlcoCONNECT Mobile

The Alcolizer HH Series has been specifically designed for commercial and industrial alcohol breath testing where evaluation is required in a rugged format suitable for flexible use around the workplace.

ALCOLIZER HH3
Breath Alcohol Tester

Accessories
- Mouthpieces
- Leather Case

The Dräger Alcotest® 3820 is a personal use breathalyser which offers responsible drivers a reliable way to test their breath alcohol and gives them the assurance of being legal to drive. This is ensured by precise measurement technology identical to that used by the police.

DRAEGER 3820
Personal Alcohol Tester

CERTIFIED DRUG & ALCOHOL COLLECTOR TRAINING

The most recent course available is the ‘Certified Workplace Drug & Alcohol Collector Training’. Because most certified courses require attendance in person, which can be expensive and inconvenient, CMM Technology™ has developed an online/remote training version that can be done at work or in your own time saving valuable time and money.

Fully compliant and nationally recognised, this online course is extremely popular as you can work at your own pace. It consists of four online modules with multiple choice Q & A’s and three practical assessments that we send to you, utilising hands-on scenarios. You will be trained in the special procedures that apply for drugs of abuse testing.

This unit describes in detail, the skills and knowledge required to:
- confirm collection requirements
- prepare client and equipment
- collect specimens via urine and/or oral fluid
- conduct a breath alcohol test

This unit applies to individuals working in collection centres, hospitals, other healthcare environments and workplaces where drugs of abuse testing takes place.

Delivered in agreement with Business Planning Services. An RTO (No.52705) operating under the Australian Skills Quality Authority (ASQA)

EXCEEDS THE REQUIREMENTS OF:

This course covers:
- ORAL FLUID
- URINE
- BREATHE ALCOHOL

Course Information
- HLTPAT 005 - Collect Specimens for Drugs of Abuse Testing
- Online and practical - Learn at your own pace

HYDRATION MANAGEMENT

HYDRATION TESTING

Urine Refractometer

Hydration management is a serious business in Australia where dehydration in the workplace can be very dangerous.

The Atago urine refractometer is the first tool in your arsenal to turn to in order to detect the presence of dehydration in your workers, thus allowing you to take steps to re-hydrate before it gets serious.

SG Pen Features:

- Ergonomically designed for one-handed operation.
- Protection class of the PEN is IP65 (Prism head IP67). You can rinse off the sample by running water on the prism. The design allows the user to easily wipe off the sample.
- Clinical refractometer
- Revolutionary new feature ELI - External Light Interference (ELI).
- Convenient Storage case.

ADDITIONAL INFO

Quick and easy to use dip test taking only 2 seconds for a result – simply clean up by rinsing under a tap.

Japanese made for a quality product.

HAND-HELD “POCKET” REFRACTOMETER

PAL-10S

Workplace hydration is a challenge all year round, so if you are thinking about measuring hydration in the workplace this high quality device should be considered.

The PAL-10S is a digital hand-held compact refractometer to measure urine S.G. quickly and efficiently and can be integrated into AOD & Worker Health programs.

Features:

- Ergonomically designed for one-handed operation
- Clinical refractometer
- Calibration with water
- Digital Display

Accessories

- Storage Case

ADDITIONAL INFO

Quick and easy to use dip test taking only 2 seconds for a result – simply clean up by rinsing under a tap.

Australian Conditions

The SG Pen is built for Australian conditions and offers a fast accurate measurement of hydration.

ADDITIONAL INFO

Quick and easy to use dip test taking only 2 seconds for a result – simply clean up by rinsing under a tap.

Japanese made for a quality product.

SD UROCOLOUR

Dip test

The SD UroColorTM, when used in workplace testing environments, can provide indications of dehydration and adulteration of urine samples.

The SD UroColorTM is a fast & economical tool for use in workplace in both the medical centre or as a support for AOD programs.

The test also provides information regarding the status of carbohydrate metabolism, kidney and liver function, acid-base balance and urinary tract infection.

The PAL-10S is a digital hand-held compact refractometer to measure urine S.G. quickly and efficiently and can be integrated into AOD & Worker Health programs.

Features:

- Ergonomically designed for one-handed operation
- Clinical refractometer
- Calibration with water
- Digital Display

Accessories

- Storage Case
Be it Oral Fluid or Urine and A/B Sample kits - we just when you really need them.

We supply extensive stock so you are not caught short on site when you need them.

We supply a wide range of mouthpieces and carry them.

Correct forms and also instructions on how to use them.

One of the easiest ways to fail at testing is to have the wrong forms. One of the resources and Chemistry Precinct - Reception of hand-held & wall mount breathalysers.

If you have an existing policy or program and wish to review policy, procedures or the whole system we can help. If you are starting out and need assistance in constructing a robust policy, we can help. In fact if you have any questions or problem areas in this field we can help.

CMM Technology provide many services that you may not know about. Our services are designed around filling the gaps in knowledge & related services for our clients operating in the AOD (Alcohol & Other Drugs) & Hydration testing arena.

We view our testing services as an essential risk management tool and provide many services to support that process and stance.

When you test and you need to send your sample(s) to the lab, we have the right kit for your purpose. Be it Oral Fluid or Urine and A/B Sample kits - we have got you covered.

CMM Technology is uniquely equipped to help engineer a practical, sustainable and quality risk management system that minimises risks and adds value to your business operations.

We offer 2 levels of training to cover all your AOD training requirements:

- Nationally Accredited Collector Training
- Online product training.

We are a NATA Accredited collecting agency and supply onsite AOD testing services across Australia. We currently service over 700 sites nationwide.

We can provide toolbox education sessions for your staff on a range of subjects depending on your needs. Talk to us today to see what we can offer.
“I have dealt with CMM for the calibration of our breathalysers for about a year now. Administration staff are very friendly and turnaround time for calibration is very efficient. I highly recommend this company for others that need to calibrate equipment in compliance with NATA approval.”

“Good turnaround times, friendly and helpful company. They’ve never let me down...”

“Super impressed with your service, many thanks for your effort.”

“The customer service at CMM is superb as always.”

“Very fast and professional while also friendly and accommodating”

“Your simple ordering, fast delivery and sales backup are invaluable as we have a fast paced business that requires prompt service and advice, regardless of the fact that we are on opposite sides of the continent makes little difference to your service and support. Your prompt dispatch of orders makes it possible and feasible to deal with an interstate company.”

“Excellent source of information, fast efficient turn around of our equipment. Willing to help where ever they can.”

“Professional and dedicated staff that deliver excellent service”

“Great company to deal with! Never had any problems with CMM! Excellent Customer Service!”

“Once again you have outdone yourselves...”

“I’ve been using CMM for over 4 years and have always been happy with their friendly and speedy service”
