COMPETENCE**

Our Point of Difference?

- Accredited Technicians
- Nata Accredited Laboratory
- Certified Gases And Solutions
- Proficiency Tested Equipment
- Temperature Controlled Facility
- Audited Processes
- Certificate For Each Calibration
- Free Reminder Service

What Our Customers Are Saying...

"I have dealt with CMM for the calibration of our breathalysers for about a year now. Administration staff are very friendly and turnaround time for calibration is very efficient. I highly recommend this company for others that need to calibrate equipment in compliance with NATA approval."

"Good turnaround times, friendly and helpful company. They've never let me down..."

"Super impressed with your service, many thanks for your effort."

"Your simple ordering, fast delivery and sales backup are invaluable as we have a fast paced business that requires prompt service and advice, regardless of the fact that we are on opposite sides of the continent makes little difference to your service and support. Your prompt dispatch of orders makes it possible and feasible to deal with an interstate company."

Quality Guaranteed

CMM Technology™ is the only company in Australia to have attained the coveted status of NATA accreditation to ISO/IEC 17025 – Chemical Testing for calibration of wall mounted and hand-held breathalysers.

There are many companies out there 'calibrating' breathalysers, the results of which may jeopardise your business having been poorly calibrated.

We know this as fact – we have been calibrating since 2007 & often receive brand new supposedly 'calibrated' breathalysers, that are up to 30% out of specification!

The ramifications of a poorly calibrated breathalyser to both the employee and the business concerned is huge; it may mean the difference between your worker being stood down for a positive test when he is not, or even more concerning - a worker who is not identified as positive when they are, putting other workers at risk.

Are you prepared to take the chance on a substandard provider calibrating your breathalysers? A NATA accredited calibration provides peace of mind, ensuring your device is fit for purpose and accurate.

Talk to us today for an obligation free quote or pop in for a free calibration check.
